

Tired of SMART Goals?
Try Some DUMB Ones.

Todd Stanley

May 12, 2020

Zane State College Cambridge Campus

Todd Stanley is the author of many teacher-education books including Project-Based Learning for Gifted Students, Authentic Learning: Real World Experiences that Build 21st Century Skills, and Using Rubrics for Performance-Based Assessment. He served as a classroom teacher for 18 years and is currently the gifted services coordinator for Pickerington Local Schools. You can follow him on Twitter @the_gifted_guy or visit his website at thegiftedguy.com where you can access blogs, resources, and view presentations he has given.

According to the Pathways for Prosperity, when employers from around the world were asked what attributes they seek in employees, they listed leadership, teamwork, and initiative as their top skills. The problem of course is that it is difficult to measure or put a grade on such skills when working with students in the classroom. Todd will present on ways to focus on 21st century skills in the classroom and how to measure these skills. Todd will discuss the topic of Discipline/professional skills Used to Make students Balanced (DUMB) goals. This workshop will illustrate how participants not only can measure such valuable skills in the classroom but will also have participants create an objective rubric to do so.

Audience: Administrators and Teachers who believe in the importance of teaching 21st century skills in the classroom and seek ways to measure them.
